PROFESSIONAL SUMMARY

Results-driven Full Stack & Backend Engineer with 3.5+ years of experience architecting resilient microservices, designing high-throughput REST APIs and building interactive web platforms. Proven track record delivering multi-tenant SaaS products, AI workflow automations and enterprise platforms across FinTech, AdTech and Property Management, with sub-100ms response latencies.

WORK EXPERIENCE

Backend Engineer

Scloudin

Feb 2025 – Present | Noida, India / Remote

Tech stack: Node.js, Express.js, MongoDB, PostgreSQL, Redis, Docker, AWS

- Architected and deployed backend microservices and secure RESTful APIs for production platforms including WhiteAds, Tenantify, StayNOVA, Meerai, RISM, GateKeeper and TextExtract.
- Implemented multi-tenant database schemas and robust Role-Based Access Control (RBAC) ensuring data isolation and enterprise-grade security.
- Developed automated OCR parsing pipelines for TextExtract, handling async file recognition with sub-second turnaround.
- Engineered high-concurrency visitor tracking and real-time gate log processing for GateKeeper.
- Optimized query indexing, connection pooling and Redis caching across rental inventory modules, cutting API response times by 35%.

Full Stack MERN Developer

Empiric Infotech LLP

Dec 2024 – Feb 2025 | Surat, India

Tech stack: React.js, Node.js, Express.js, Tailwind CSS, Docker, DigitalOcean, Elasticsearch, ChatGPT API, Cloudflare, n8n

- Led end-to-end design and development of an AI-powered Applicant Tracking System (ATS) from scratch, as sole owner of development, deployment, monitoring and maintenance.
- Built Admin and User panels in React.js and RESTful APIs in Node.js/Express on a microservices-based backend.
- Integrated OpenAI ChatGPT APIs to automate candidate resume screening, scoring and smart outreach.
- Automated core business processes using n8n workflows, reducing manual screening overhead by 40%.
- Integrated Elasticsearch for fast, multi-filter candidate search over extensive datasets.
- Containerized services with Docker, deployed on DigitalOcean and managed DNS/security via Cloudflare.

React.js Developer (Contract)

Corenet Tech LTD

Jun 2024 – Dec 2024 | Remote

Tech stack: React.js, Vercel

- Delivered 4 client projects as the primary React.js developer: an admin panel, a business-facing web app for the same product, a community platform for London-based students and a static shop website.
- Engineered modular, reusable, high-performance React component libraries with responsive state handling.
